

SHAY PELEG

Senior Software Engineer | Full-Stack & Frontend Specialist

+972-545202522 @ shay.peleg11@gmail.com linkedin.com/in/shay-peleg11

SUMMARY

Versatile **Senior Full-Stack Engineer** with 5 years of experience building complex, end-to-end web applications and modern AI-driven platforms. Evolved from deep frontend architecture (React, Jotai, TypeScript) into building robust full-stack systems encompassing backend APIs and server-side logic. Highly specialized in AI system orchestration, including multi-agent environments, MCP integrations, and creating standardized AI coding workflows. Passionate about bridging scalable infrastructure with intuitive, high-performance user experiences.

EXPERIENCE

Full-Stack Engineer - Frontend Specialist

[dig.ai](#)

01/2025 - Present Tel Aviv-Yafo, Israel

- Spearheaded the end-to-end development of two flagship AI chatbot solutions: a complex enterprise-facing product and a self-serve platform ([ask.dig.ai](#)).
- Architected scalable frontend infrastructure and managed highly dynamic application state utilizing Jotai and JSS, ensuring responsive and performant user interfaces.
- Expanded technical scope by executing full-stack integrations, bridging complex frontend UI features with backend services to support sophisticated conversational workflows.
- Supercharged feature velocity and optimized development lifecycles by integrating AI-native coding tools (Cursor, Claude Code) directly into daily engineering workflows.

Frontend Engineer

[Code Ocean](#)

10/2021 - 10/2024 Tel Aviv-Yafo, Israel

- Developing from scratch, refactoring and maintaining client side features of a complex single page React application
- Creating atomic React components and hooks, combining components with logic using React hooks, Redux and Redux Saga, and connecting to the API
- Working in tandem with BE developers, product, and QA to create fully functional, user friendly, and bug free experience
- Constantly learning and improving my skills as part of an experienced FE team

EDUCATION

B.sc Software Engineering

[Sami Shamoon College of Engineering](#)

10/2018 - 08/2022

B.sc Life Sciences

[Ben Gurion University](#)

10/2014 - 07/2018

CORE TECHNICAL EXPERTISE

Full-Stack Engineering & Architecture

Designed and implemented end-to-end architectures, seamlessly bridging advanced client-side UI (React, Next.js) with scalable backend services, RESTful APIs, and database integrations (Node.js, Python).

AI System Orchestration & Tooling

Proficient in managing multi-agent architectures and utilizing the Model Context Protocol (MCP) for seamless LLM tool integration. Led engineering efficiency by configuring .md instruction files (system prompts/guidelines) and building reusable, custom AI developer skills adopted across the entire R&D team.

Frontend Ecosystem

Specialized in complex state management (Jotai, Redux/Saga) and scalable styling strategies (JSS, Tailwind, Styled-Components), delivering pixel-perfect, highly responsive enterprise applications.
